DETAILED ACTION

Receipt is acknowledged of the amendment filed 03/27/2008.

After review, the following rejections are maintained in this action:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Similar to the prior action, the term fibronectin-like blocks is unclear in that no explanation is given as to what this entails. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5, 9, 10, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Buscemi et al (US Patent No. 5,500,013)

Buscemi et al disclose a device for implanting into the vasculature comprising a biodegradable matrix, at least one drug, and the device having a ring-like structure capable of degrading (see Abstract; col. 12, lines 47-67; col. 13, lines 1-13; Figures 1 and 3). Specific biodegradable matrix materials are found at col. 4, line 55 and col. 6, lines 10-37. Drugs disclosed for incorporation into the matrix are found at col. 12, lines 59-67; col. 13, lines 1-13. These include particle forms of the bioactive (microcapsules) at col. 10, lines 61-64, and additionally meet the limitation of a drug being incorporated into the particles. Anti - inflammatories are specifically recited at col. 13, lines 4 and 5. Mechanical expansion is disclosed at col. 5, lines 61-64. Gluing the device to the vessel wall is disclosed at col. 3, lines 1-4. The instant claims are anticipated by Buscemi et al.

Claims 6, 11-20 are objected to as dependent upon a rejected base claim.
